Name, student number	Comments (complete sentences required)
Self	I always tried to keep up with the team. I always followed up and joined team meetings to discuss the problems we are facing and come up with their solutions. I tried to present all my work on time assigned to me by the team and incorporated all their feedbacks into my work. I am a very good communicator and attending the tutorial classes also helped increase my connection with my teammates.
Jessica BG	Jessica has always been a powerhouse for our team. She is directive and did well to communicate between everyone. She might be the only person other than me who communicates. She also takes her tasks very seriously and always delivers on time.
Trung Kien	Trung has been an exceptional team member. He goes beyond what is asked from him. He is also a very good coder and never turned us down when we needed any help. He also attends every meeting and tries to communicate. Although he is lacking in communication skills his other skills complement that.
Truong Pham	Pham hasn't been the most active member in our team but still tires to attend 1 out of 3 meetings. We sometimes see him in class, and he is a quite guy. He did put out some good work at the first half of the journey but later he was not communicating as much and put very little contribution to the final tasks

Shane Cunha	He has been absent from the 2nd week and never attended class or contributed to the sprint.
Tracey Dao	Tracey in the first week was really communicating, but slowly from 3rd week her presence faded, and she stopped coming to class and meetings. She did put out some work which appeared to be copied from some other places and we had to redo everything on the tutor's negative feedback on them. She hasn't been cooperative at all.
